

NRG CLOUD

THE USER-FRIENDLY CORE OF A RELIABLE AND ACCURATE DATA ECOSYSTEM.

NRG Cloud is the intuitive, web-based data management platform for NRG's industry-leading resource measurement hardware. Users can reliably access wind and solar data, configure NRG equipment, and troubleshoot potential issues from anywhere, ensuring the most turnkey experience possible.

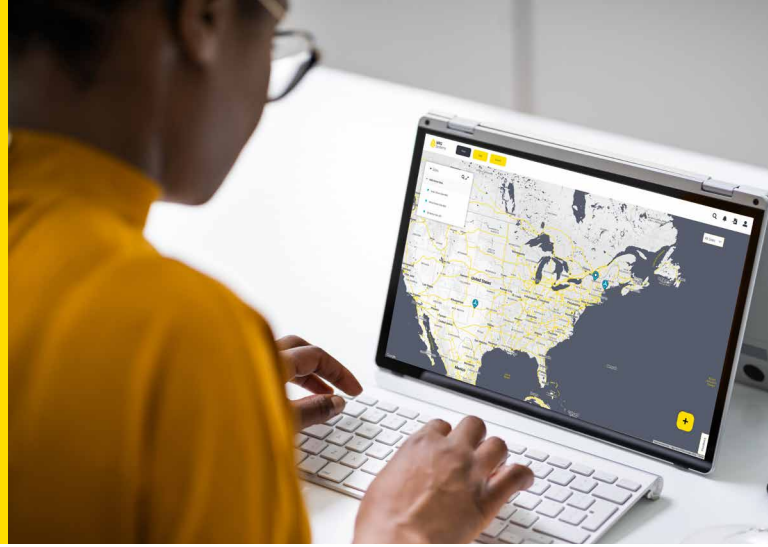

NRGSystems®

ACCESS RELIABLE DATA WITH EASE

For over 40 years, the world's leading wind and solar developers have depended on NRG's user-friendly measurement systems for reliable and accurate data collection. Thanks to NRG Cloud accessing meteorological data has never been easier. With comprehensive, high-quality data within reach, NRG Cloud users have the intelligence required to make powerful decisions.

SUPPORTED PRODUCTS: ZX Lidars, SymphoniePRO Data Logger, LOGR-S Data Logger, LOGR | Solar Data Logger

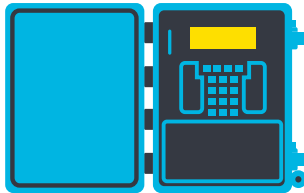

NRG CLOUD FEATURES

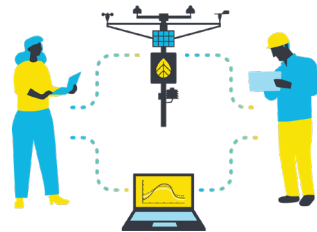

AUTOMATED DATA STORAGE

Programmatically store data from all campaign assets on servers for analysis and bankable report creation

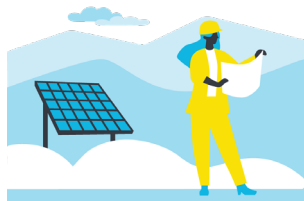

REMOTE LOGGER CONFIGURATION

Change site settings and set data logger check-ins at user-selectable interval (every 10 minutes to 1x/week) without a static IP

COMPREHENSIVE FLEET MANAGEMENT

View and manage the health and operability of all active sites while storing historical data from past campaigns on a single platform

EXISTING WORKFLOW INTEGRATION

Plug NRG data into your existing data analysis pipelines via APIs for data retrieval, advanced alerts, and document storage

ENTERPRISE FEATURES

ADVANCED ALERTS

- Comprehensive alert coverage for a wide range of weather parameters and data quality metrics
- Impact-based alert classification using an impact scale from NRG data science experts

CUSTOM RULES

- Set alerts for when sensor measurements exceed or fall below specified values, keeping you steps ahead of potential issues

ACTIONABLE SUMMARIES

- Weekly emails summarizing all critical alerts
- Fleet view of critical, active, and unacknowledged alerts

DOCUMENT STORAGE

- Store installation documents, site photos, calibration reports and other relevant documentation alongside campaign data
